

Vintage LEDs

Installation Instructions for 64-73 F100 Dome Light

Dome Light Removal

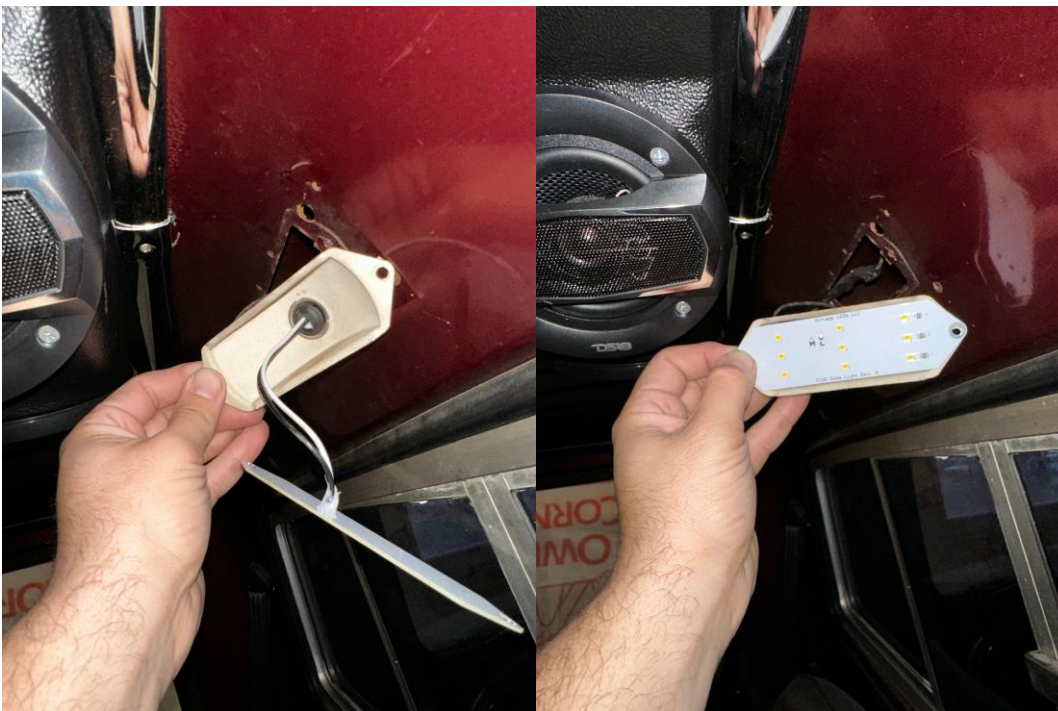

Remove the two screws that hold the lens and light assembly.
Remove bulb.

Dome light board assembly uses a BA15S adapter plug.

New lenses can be purchased from various suppliers, such as Autocrafters.
Part # C4TZ-13783CC

Insert plug into bulb socket.

Place lens over LED board. Insert screws to align Lens to LED board and light assembly.

Tighten screw to cab.

Now enjoy your new Vintage LEDs Dome Light.
